|---|---|
| **Project Name** | ServiceNow-Based Employee Laptop Request Application |
| **Maximum Marks** | Not specified |

## Project Overview:

**Project Name:** ServiceNow-Based Employee Laptop Request Application

**Project Description:** A ServiceNow application that lets employees submit laptop requests through the Employee Service Catalog, routes requests to the selected manager for approval or rejection, prevents duplicate annual requests, and applies role-based access controls.

**Project Version:** Current project version (not separately numbered).

## Testing Scope:

• Request submission and automatic request number generation.
• Required-field validation and saving request details.
• Manager approval/rejection and status updates.
• Annual duplicate prevention and different-year requests.
• Role-based access and configured notifications.

## Testing Environment:

**URL/Location:** ServiceNow development instance.

## Test Cases:

| Test Case ID | Test Scenario | Test Steps | Expected Result | Actual Result | Pass/Fail |
|---|---|---|---|---|---|
| TC-001 | Submit a valid laptop request | Open Laptop Request in the Employee Service Catalog, fill required fields, and submit. | A request is created and a request number is generated automatically. | Request created successfully; request number generated automatically. | Pass |
| TC-002 | Required-field validation | Leave a required field empty and submit. | Submission is blocked and the missing field is indicated. | Submission was blocked and the missing required field was indicated. | Pass |
| TC-003 | Request details saved correctly | Submit a request, reopen its record, and compare saved values with the submitted values. | Requester, manager, request type, reason, short description, email, and request date are correct. | Request type/reason matched selections; requester/manager were correct; short description and date were correct; details persisted. Email field was not separately verified. | Pass* |
| TC-004 | Manager approval record | Submit a request with a manager selected and inspect the approval record. | An approval record is created for the selected manager. | Approval record created for the selected manager. | Pass |
| TC-005 | Manager approves request | Approve a pending request and inspect its record. | Status changes to Approved. | Request status changed to Approved after approval. | Pass |
| TC-006 | Manager rejects request | Reject a pending request and inspect its record. | Status changes to Rejected. | Manager rejected the request and status changed to Rejected. | Pass |
| TC-007 | Duplicate request in same year | Attempt a second request for the same requester in the same calendar year. | Duplicate is blocked and a message is displayed. | Duplicate submission was blocked and a message was displayed. | Pass |
| TC-008 | Request in a different calendar year | Submit a request for the same requester when their existing request is from another calendar year. | New request is accepted. | New request was accepted for a requester whose existing request was from a different calendar year. | Pass |
| TC-009 | Employee restricted access | As an employee, attempt to access a manager-restricted function or record. | Restricted action or record is inaccessible. | Employee was prevented from accessing the restricted function or record. | Pass |
| TC-010 | Manager approval access | As a manager, open a pending approval record and attempt the approval action. | Manager can access the record and take action. | Manager could access the approval record and take action. | Pass |
| TC-011 | Manager notification | Submit a request and check for the configured manager notification. | Manager receives the configured notification with correct request details. | Manager received an email with correct request details. No separate email-link functionality test is included. | Pass |

| Test Case ID | Test Scenario | Test Steps | Expected Result | Actual Result | Pass/Fail |
|---|---|---|---|---|---|
| TC-012 | Requester notification | Complete a request decision and check the requester's inbox. | Requester receives the configured outcome notification. | Requester received the expected email notification. | Pass |
| TC-013 | Rejection notification | Reject a request and check the requester's inbox. | Requester receives a notification reflecting rejection. | Requester received an email reflecting the rejection. | Pass |
| TC-014 | Request record/status consistency | Open a completed request and inspect saved details and final status. | Saved details and final status are correct. | Request details and final status were saved correctly. | Pass |
| TC-015 | Catalog item availability | Open the Employee Service Catalog and select Laptop Request. | The item is visible and the form opens successfully. | Laptop Request item was visible and the form opened successfully. | Pass |
| TC-016 | Unique request numbers | Create two eligible requests and compare their generated numbers. | Each request receives a distinct generated number. | Both requests received different, automatically generated numbers. | Pass |
| TC-017 | Employee views own completed request | Open the employee's own request after a decision is completed. | Employee can view their completed request. | Employee could view their completed request. | Pass |
| TC-018 | Other employee's restricted request | As an employee, attempt to open another employee's restricted request. | Access is denied according to configured permissions. | Employee could not access another employee's restricted request. | Pass |

## Bug Tracking:

| Bug ID | Bug Description | Steps to reproduce | Severity | Status | Additional feedback |
|---|---|---|---|---|---|
| No defects were reported in the recorded outcomes. | Not applicable | Not applicable | N/A | No defect reported | No defect details were supplied during testing. This is not a claim that no defects exist. |

## Sign-off:

**Tester Name:** Namratha Kalivarapu

## Notes:

The report follows the supplied template structure. Date, signature, Team ID, and credentials fields are omitted. TC-003 is marked Pass* because the email field was not separately verified and should be checked before formal acceptance. The separate approval email-link functionality test is excluded. No test about emails being sent before approval is included.
