Project Design Phase-II
Data Flow Diagram & User Stories

Project Name	ServiceNow-Based Employee Laptop Request Application
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) shows how information enters, moves through, and leaves a system, including the processes and records involved.

Example: DFD Level 0 (Context Diagram)

Note: The diagram represents the request and manager-approval scope. Procurement, device allocation and delivery tracking are not assumed unless implemented.

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Employee	Laptop Request	USN-1	As an employee, I can submit a laptop request through the Service Portal by entering the required information.	The form validates required fields, creates a request record, and generates a request number.	High	Sprint-1
		USN-2	As an employee, I can correct missing or invalid information before submitting my request.	The system prevents submission while required fields are invalid and displays a clear message.	High	Sprint-1
		USN-3	As an employee, I receive confirmation after submitting my laptop request.	A success message is displayed and the generated request number is available to the employee.	High	Sprint-1
	Request Tracking	USN-4	As an employee, I can view the status of my laptop request.	The employee can view the latest status of their own request, subject to access permissions.	High	Sprint-2
Manager	Manager Approval	USN-5	As the selected manager, I receive an approval request for the employee's laptop request.	An approval record is created and assigned to the selected manager when the approval workflow runs.	High	Sprint-1
		USN-6	As a manager, I can approve or reject a laptop request.	The selected decision is saved against the correct request and approver.	High	Sprint-1
Employee	Notifications	USN-7	As an employee, I receive an email notification when my request is approved or rejected.	The requester receives the decision notification after the approval outcome is recorded, if notifications are configured.	High	Sprint-2
IT Administrator	Request Management	USN-8	As an authorized IT administrator, I can review laptop request records and their status.	Authorized IT staff can view request details and status, subject to role permissions.	Medium	Sprint-2
		USN-9	As an authorized IT administrator, I can identify requests that are waiting for manager approval.	Pending approval records can be identified and linked to their corresponding laptop request.	Medium	Sprint-2
Employee	Next Steps	USN-10	As an employee, I receive clear information about the next step after the approval decision.	The outcome message clearly states approval or rejection and provides next-step guidance supported by the configured process.	Medium	Sprint-2
