Project Design Phase-II

Solution Requirements (Functional & Non-functional)

Project Name	ServiceNow-Based Employee Laptop Request Application
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Laptop Request Submission	• Submit a laptop request through the Service Portal / Record Producer • Enter required employee and laptop details • Generate request number automatically
FR-2	Request Validation & Record Creation	• Validate mandatory fields before submission • Prevent submission when required information is missing • Save the request in the laptop request table
FR-3	Manager Approval	• Route the request to the manager selected in the form • Create an approval record for the selected manager • Allow the manager to approve or reject the request
FR-4	Status & Email Notifications	• Maintain request status throughout the approval process • Notify the employee about submission and decision • Send the approval notification/link to the assigned manager

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

NFR No.	Non-Functional Requirement	Description
NFR-1	Usability	The request form should be clear and easy for employees to complete, with understandable field labels and validation messages.
NFR-2	Security	Only authorized users should access request and approval information; employees should access only permitted records.
NFR-3	Reliability	Submitted requests and approval decisions should be saved accurately, with workflow actions linked to the correct request.
NFR-4	Performance	The request form and common actions should respond within a reasonable time under normal usage.
NFR-5	Availability	The application should be accessible whenever the organization's ServiceNow instance is available.
NFR-6	Scalability	The solution should support increasing numbers of employees and laptop requests without requiring major redesign.
